

JUNRUI DI

(Updated Mar 1st 2020)

610 Main St, Cambridge, MA 02139

dijunrui@gmail.com ♦ <https://junruidi.github.io/>

STATISTICAL METHODS RESEARCH INTERESTS

feature engineering from accelerometry signals, dimension reduction, functional data analysis, integration of multiple modalities, multilevel data, machine learning/deep learning.

SCIENTIFIC RESEARCH INTERESTS

wearable devices and their applications in public health (e.g. mental health and aging) and clinical trials (e.g. disease monitoring and assessment), physical activity assessment, sleep, circadian rhythmicity.

EDUCATION

Johns Hopkins Bloomberg School of Public Health

Mar 2019

Ph.D. in Biostatistics

Thesis: *Feature Engineering and Statistical Modeling of Wearable Devices Data*

Advisor: Vadim Zipunnikov, Ph.D.

Georgetown University

Dec 2013

M.S. in Biostatistics

Thesis: *Robust Integrative Analysis of Multi-Block Contaminated Datasets*

Advisor: Valeriy Korostyshevskiy, Ph.D.

University of California, Berkeley

May 2012

B.A. in Applied Mathematics

High Distinction General Scholarship (roughly equivalent to Magna Cum Laude)

EXPERIENCE

Pfizer

Cambridge, MA

Manager, Digital Medicine Statistics

Apr 2019 - Present

- Responsible for ensuring sound statistical thinking and methods are utilized in the discovery and development of new digital and wearable biomarkers by bringing the principles of objective decision-making into the development, validation and implementation of industry-leading mobile/digital technology programs for incorporation into clinical trials.
- Interact with internal and external experts to assure sound quantitative approaches are applied to collection and analysis of a wide variety of digital and wearable data types.
- Apply statistical expertise to prepare both internal and external reports, presentations, manuscripts.

Johns Hopkins Bloomberg School of Public Health

Baltimore, MD

Research Assistant

Jun 2015 - Apr 2019

- Developed statistical methods to extract features from noisy accelerometry signal, to reduce dimensionality of multivariate accelerometry features, and to integratively analyze features representing multiple physiological domains.
- Conducted data processing and statistical analysis of multiple studies with measurements of sleep, activity, and circadian rhythms using wearable devices.

Takeda Pharmaceuticals*Biostatistician Intern**Cambridge, MA**Jun 2018 - Aug 2018*

- Provided theoretical and analytic evidence that digital endpoints measured by wearable devices are more sensitive than traditional measurement.
- Developed an R Shiny App to analyze/visualize clinical data from a chest-worn device used to measure physical activity and cardiovascular behavior to assist clinicians to identify false positive events reported.

Georgetown University*Research Assistant, Department of Medicine**Washington, DC**May 2013 - Apr 2014*

- Supported the Multicenter AIDS Cohort Study (MACS) site PI by providing data analysis, visualization, and tabulation on data generated from the 30-year nationwide longitudinal cohort study involving four sites, and over two hundred tested variables.
- Quantified satisficing in MACS online survey based on the group-based trajectory analysis of average response time across visits.

*Research Assistant, Department of Biostatistics**Sep 2012 - May 2013*

- Refined “Joint and Individual Variation Explained” (i.e. JIVE), a recently developed integrative analysis method of multi-block datasets of different types, to be robust to outliers using low-rank approximation based on robust singular value decomposition.
- Selected metabolomics biomarkers to develop clinical assays for diagnosis and prognosis of Pancreatic Ductal Adenocarcinoma (PDAC) by applying various variable selection techniques.

SOFTWARES

1. **cdHOTS** (R package). Construct and decompose higher order tensorial statistics.
<https://github.com/junruidi/cdHOTS>
2. **actigraphy-profiles** (R Shiny app). A visualization tool for displaying minute-level actigraphy profiles.
<https://github.com/junruidi/actigraphy-profiles>
3. **ActFrag** (R package). Extract activity fragmentation metrics from minute level actigraphy data.
<https://cran.r-project.org/web/packages/ActFrag/index.html>

4. **ActCR** (R package). Extract circadian rhythms metrics from actigraphy data.

<https://github.com/junruidi/ActCR>

PRESENTATIONS

1. Integrative Analysis of Domains of Physical Activity, Sleep, and Circadian Rhythmicity Collected by Wearables. (**invited**). *2019 JSM, Denver, Colorado*.
2. Joint and Individual Representation of Domains of Physical Activity, Sleep, and Circadian Rhythmicity Collected by Wearables (**invited**). *2018 BigDIA, Houston, TX*.
3. Capturing Enhanced Information with Higher-Order Tensorian Statistics and Predicting Mortality from Accelerometry-MeasurePhysical Activity (contributed). *2018 JSM, Vancouver, BC, Canada*.
4. Analysis of Tensor Cumulants and Its Application to NHANES (contributed). *2018 ENAR, Atlanta, GA*.
5. Fragmentation of Daily Physical Activity: Prediction of Mortality in NHANES 2003-2006 (oral). *2017 IAGG, San Francisco, CA*.
6. Fragmentation of Physical Activity and Its Application (oral). *2017 ICAMPAM, Bethesda, MD*.
7. Novel Statistical Framework to Quantify Fragmentation of Physical Activity (contributed). *2017 ENAR, Washington, DC*.
8. Integrative Analysis of Multi-Block Contaminated Datasets (topic contributed). *2013 JSM, Montreal, Canada*.

PROFESSIONAL ACTIVITIES

HONORS & AWARDS

The W.E. Upjohn Prizes Award

Sep 2019

This award recognizes and rewards colleagues for an exceptional contribution to the business while demonstrating the Pfizer values and culture. Prizes should be awarded to colleagues for contributing above and beyond ones' job & responsibility to an outcome that helps achieve a business goal.

BigDIA Travel Award

Sep 2018

This is the travel award for the 4th International Conference on Big Data and Information Analytics.

The June B. Culley Award

Dec 2017

This award honors outstanding achievement by a Biostatistics student on his or her schoolwide examination paper.

The Louis I. and Thomas D. Dublin Award

Mar 2017

This award, which is for the Advancement of Epidemiology and Biostatistics, supports those students whose research focuses on the effective use of statistical reasoning and methods in epidemiology.

Washington Statistical Society Outstanding Graduate Student Award

Jun 2013

This award is presented by the Washington Statistical Society to the outstanding full-time graduate student of statistics/biostatistics at each university in the Washington metropolitan area with a graduate statistics/biostatistics program.

Phi Beta Kappa Honor Society Inductee

May 2012

Phi Beta Kappa Honor Society
